

## The Real-Life Benefits Of Using A Condom

These are condoms. Since their invention in 1855, rubber condoms, when used correctly, have been 98% effective in decreasing unwanted pregnancies & every type of sexually transmitted disease known to humankind! There are different types of condoms to suit your needs, but always double check the label to make sure the one you choose will protect you from STD's & decrease the probability of pregnancy.

Abstinence is the prevention method, yet with sex being a part of our nature, it's important to be realistic. When you decide to have sex, please be responsible & respectful.

Condoms being almost as effective in preventing pregnancy as the birth control pill, are more affordable, easily accessible, protects you from sexually transmitted diseases & you can buy them from almost anywhere. So whether you lean pro choice or not: Want to prevent certain abortions? Wear a condom. Don't like STD's? Wear a condom. Don't like people telling you what to do? Wear a condom. Not all heroes wear capes, they wear condoms too. For free condoms visit, Thrive Alabama & Pleasures.
